DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 15-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 15 recites "(A) computer readable recording medium recorded with an advertisement information providing program for realizing on a computer, in the preamble. However the body of the claim recites "a card sending service", "an advertisement information adding function" and "an advertisement information presenting function". It is not clear whether applicant is claiming program parts, which are part of the program recited in the preamble or method steps. If these features mentioned above are program parts then the preamble should include a statement indicating that the program parts are part of the advertisement information-providing program.

Claims 16-20 are rejected since they are dependent to rejected claim.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Art Unit: 3622

Claims 15-20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Merely claiming nonfunctional descriptive material stored in computer readable medium does not make the invention eligible for patenting. For example, claim directed to a word processing file stored on a disk may satisfy the utility requirement of 35 USC § 101 since the information stored may have some “real world” value. However, the mere fact that the claim may satisfy the utility requirement of 35 USC § 101 does not mean that a useful result is achieved under the practical application requirement. The claimed invention as a whole must produce a “useful, concrete and tangible” result to have a practical application.

The application is claiming a program stored on a computer readable medium for realizing on a computer. The claimed invention does not claim an executable computer program or software, when executed by a computer to perform the claimed steps.

Although the recited process produces a useful, concrete, and tangible result, since the claimed invention, as a whole, is not within the technological arts as explained above, claims 15 and claims depending from are deemed to be directed to non-statutory subject matter.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-20 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Intellipost as taught by the article “Intellipost Launches BonusMail with 50,000 Charter
